ABHAY PRATAP SINGH *QA Engineer*

singh.abhay99@outlook.com | +91 8932870552 | Bengaluru | linkedin.com/in/abhay-singh | abhsingh.vercel.app

PROFESSIONAL SUMMARY

QA Engineer with 4+ years of professional experience, including hands-on QA across healthcare (NHS, UK), e-commerce, and consumer mobile applications, specializing in manual, API, and automation testing using Playwright (TypeScript) and Selenium WebDriver (Java). Experienced in owning QA from early builds through App Store and Play Store launches, building large end-to-end regression suites, and developing internal test automation tooling with AI-assisted development. Proven track record of reducing post-release defects by 40% across Agile environments.

WORK EXPERIENCE

QA Engineer, *The Product Highway* 06/2026 – Present | Bengaluru, India

Yeapp by Krafton (Voice-First Social Messaging App) | Android, iOS

- Owned end-to-end testing from the early build phase through the Play Store and App Store launch, covering onboarding, 1:1 and group chat, voice notes, Discord-style voice rooms, and Ziggy AI, an in-app AI chat and voice companion.
- Built and executed a 400–500 case regression suite, running regression, smoke, sanity, and end-to-end feature testing on every post-launch release.
- Validated the admin panel and backend APIs in Postman, and managed bugs and tickets in ClickUp from logging through retest and closure.

Luv or Pop (Dating App from the "Pop the Balloon or Find Love" YouTube Show) | Android, iOS

- Designed regression, smoke, sanity, and end-to-end test suites, including a ~300 case E2E regression suite and 60–80 cases per feature.
- Tested onboarding, matching, chat, subscriptions, vibe-matching in-app games, and Prime Time, a time-boxed video-call dating feature where users decide to match when the call ends.
- Validated the admin panel and APIs in Postman and verified builds against Figma designs, supporting a smooth launch and stable releases.

Scuderia Car Parts (Multi-Region E-commerce Platform for Supercar Parts) | Web

- Authored a ~2,000 case end-to-end test suite from Figma designs covering pages, flows, part cards, quotes, enquiries, notifications, cart, and checkout across all modules.
- Tested localized storefronts across country domains and currencies (GBP, EUR for German and French, AED, KRW, JPY), validating language, pricing, and currency switching, and performed SEO testing of meta tags, canonical URLs, hreflang, redirects, and sitemaps.
- Automated all functional test cases using FlowQA and verified developer fixes on development and staging before each release.

FlowQA (Internal QA Automation Tool) | Playwright, TypeScript

- Developed FlowQA, a record-and-replay end-to-end automation platform, using AI-assisted development (Claude Code), building the full application on a base framework set up by a teammate and handing it over for deployment.
- Built multi-environment runs (dev, staging, production) with production safeguards, reusable test steps, shared variables, test plan import, and a project health dashboard with run history and reports.
- Enabled export of recorded tests as standalone Playwright projects in TypeScript, JavaScript, and Python for CI pipelines.

QA Engineer, *Sopra Steria India Ltd.* 02/2024 – 05/2026 | Noida, India

NHS (UK Healthcare Application) | Client Transaction Processing System

- Authored 300+ test cases with 100% functional coverage across NHS modules, and led functional, regression, integration, smoke, and sanity testing across 10+ sprint releases, reducing post-release defects by 40%.
- Validated 40+ REST API endpoints in Postman and wrote SQL queries for data integrity and reconciliation across high-volume transaction records, catching 20+ discrepancies before go-live.
- Developed Selenium WebDriver (Java) scripts using XPath and CSS locators for login, navigation, and critical workflows, and ran post-deployment smoke suites that enabled go/no-go decisions within 30 minutes.
- Managed 150+ defects in JIRA through the full lifecycle and facilitated UAT with NHS stakeholders, achieving 100% sign-off before every production release.

Operations Support Associate, *Amazon* 08/2023 – 01/2024 | Noida, India

- Conducted systematic data validation and root cause analysis on high-volume operational discrepancies, building skills later applied to QA defect investigation and backend data testing.
- Identified and escalated critical system issues affecting operational accuracy.
- Managed and validated large-scale operational data workflows, ensuring processing accuracy across high-volume daily transactions.

Marketing Executive, *Way2University* 07/2021 – 10/2022 | Noida, India

- Maintained and validated 1,000+ client records across CRM systems, ensuring data accuracy and consistency.
- Performed structured data verification and process validation checks across marketing and sales pipelines, building the attention-to-detail discipline applied in QA testing practice.
- Reviewed and cross-verified operational reports for accuracy, identifying data discrepancies and supporting process improvement initiatives.

SKILLS

Testing Types — Manual | Functional | Regression | Smoke | Sanity | End-to-End | Integration | UAT | API | Mobile App (Android, iOS) | Localization | SEO | Data Validation

Automation — Playwright (TypeScript) | Selenium WebDriver (Java) | XPath & CSS Locators

Tools — JIRA | ClickUp | Postman | Figma | TestRail | Confluence | Chrome DevTools | SQL | Git | Claude Code

Methodologies — Agile / Scrum | SDLC | STLC | Defect Lifecycle | Test Case Design | Test Planning | Test Documentation

CERTIFICATES

ISTQB-CTFL | Databricks & AI for All | Microsoft Excel | Power BI

EDUCATION

Bachelor of Business Administration, *Galgotias University* 2018 – 2021 | Greater Noida, India
BBA in Marketing & Operations
